RE: **BUSINESS OPPORTUNITIES**

Dear John

Thank you for your recent email and supporting information.

As I mentioned on the phone, QMAG is developing a business plan that would see us develop opportunities to use magnesla in a range of remedial and waste treatment applications. One potential site is at Mt Morgan where there are problems with acid tallings dumps and sludge dams. There is a large remediation and stabllisation requirement presenting an valuable opportunity very close to our operations.

We would very much like to discuss with you the possibilities at Mt Morgan. I will send you more information as soon as possible.

With regard to the CSIRO data we have discussed, my apologies for the delay. There was a mix up in this office and I was remiss in not correcting it sooner. The papers will hit your desk shortly.

Kind regards

A handwritten signature in black ink, appearing to read 'Phil Macoun'.

Phil Macoun
