UNIVERSITY OF TASMANIA
School of Chemistry

12 May 2000

Dear Mr Harrison

Thank you for your recent correspondence regarding your company's proposed research activities based on magnesia cement technology.

I note that your proposed research requires a range of expertise in chemistry, including thermodynamics, kinetics, and analysis.

The School of Chemistry at the University of Tasmania is interested in exploring further its possible involvement in the research program and believes that, on the information available to date, that it could contribute significantly to the research.

The School would be delighted to be involved in further discussion concerning its involvement when the project is approved.

You should be aware the University of Tasmania has a Research and Development Office, and that final approval for the involvement of University staff will require its agreement to the research, including consideration of intellectual property issues and appropriate provision for infrastructure expenses.

Yours sincerely

Dr Barry O'Grady
Acting Head, School of Chemistry

cc. Professor Frank Bullen, Head, School of Engineering
Laura Denholm, Research and Development Office
