## *Tasmanian Innovation Scheme Grant Applied For*

After several months of incredibly hard work we have finished a quality application for assistance under the Tasmanian Innovation scheme.

Thank you to all the people who have helped us, especially Richard Swallow and Peter Snowball of the Department of State Development Tasmania and Peter Godfrey of GCG Consulting in Launceston, Tasmania.

A list follows of all the people we are indebted to. We appreciate the time they put into understanding what we are about.

Mr Richard Swallow (DSD Tasmania)  
Mr Peter Snowball (DSD Tasmania)  
Dr Swee Mak (CSIRO Vic)  
Dr Kwesi Sagoe Crentsil (CSIRO Vic)  
Mr John Galbraith (ABM Minerals)  
Emeritus Prof. Don Nicklin (Niche Consulting)  
Mr Richard Elkington (Loy Yang Power)  
Mr Ralph Bottrill (Mineral Resources Tas)  
Mr Peter Duncan (Omnipol)  
Mr Christian Schardt (Geochemist)  
Mr Robert Boylan (Investment Commissioner – North Asia)  
Mr David Gibson (Patent Attourney - Freehills)  
Mr Phil Macoun (Marketing Manager - Qmag)  
Mr Bill Guthrie (Technical Manager - Qmag)  
Prof Peter Scaife (Newcastle University)  
Mr Ric Horn (SAMAG SA)  
Prof David Garmen (CRC for Waste Management)  
Dr Lyndon Armstrong (QAL)  
Prof Frank Bullen (Engineering UTAS)  
Prof Allan Cauty (Dean Science & Engineering, UTAS)  
Dr Barry O'Grady (Chemistry UTAS)  
Mr Peter Godfrey (GCG Consulting)

Thanks also to my wife Barbara and kids JJ & Irena who put up with long hours not being able to use the computer!

## *Our Major Accomplishment in the Last Few Weeks*

- A lot of work on developing corporate documentation – our case for funding under the various R & D schemes.
- More in the lab – some interesting results using the kiln.

## *We Intend to Apply for more R & D funding*

We need your support to secure R & D funding. If you hear of any support schemes we should apply for please let us know by email.

## *Completion of Corporate Documentation*

At last we have a complete set of documents available. Rather than email them to all recipients of the newsletter we thought it would be better to let you ask. (We do not want to clutter up your computer – see the corporate summary also attached for documents available.)

## *Need to Increase Shareholder Base.*

Having finished a mountain of work getting our documentation together it is time for directors to take stock.

We need to increase our shareholder base

If you are interested, or know anyone who may be interested we would appreciate an email or call. A corporate summary is attached where you will find more about the opportunity we are offering.

We need funds to commission further studies on our cement system and real live projects to tackle in the area of tailings solidification, agglomeration, toxic waste immobilisation etc.

John Harrison, B.Sc. B.Ec.
